Dear Friends,

I have been researching the field of vibrational energy and healing for some time. I am glad to see that there is increasing awareness of the problems relating to electromagnetic pollution. I believe that the BioShield is one of the finest products on the market, and I congratulate you on this wonderful piece of technology.

I am working as holistic practitioner in the field of bio-analysis, specializing in the field of environmental toxicity. I have a large and very sophisticated computerized system called the Monroe Harmonic Translation System, which gives results comparable to (some say more accurate than) the Voll Dermatron. I can test clients for a wide range of sensitivity and toxicity using a hair sample. The hair sample gives a complete energetic picture of the client's body and subtle bodies.

I routinely screen clients for electromagnetic pollution as well as for toxicity from lead, mercury, aluminum, etc. Many people are suffering from this condition, news that will not surprise you. You may be interested to hear of an experiment which I recently did on a client who ordered a BioShield upon my recommendation. Let me explain that my system gives both Vitality and Toxicity (or Stress) readings; these are measured on a numerical scale, and the Stress readings should not be above 100; below 100 is considered normal range.

My client was wearing a Teslar watch, so he was upset when his EM pollution reading came in at 113. Without the watch, he tested at 132 (quite a high figure), so it was helping, but clearly not enough. He then ordered a BioShield, and we obtained the following readings. Wearing the watch *and* the BioShield, the reading dropped to 50, but with the BioShield alone, his reading was 75—well within normal range, and a strong indication that, for this person at least, your product is far more effective than the Teslar Watch.

Client's Electromagnetic Pollution Scores – anything over 100 is too high	
Base Score	>>>>>>>>>>>>>>>>>>132
Score with Teslar Watch	>>>>>>>>>>>>>>>>>>113
Score with Shield and Teslar Watch	>>>>>50
Score with Shield alone	>>>>>>>75

I think you are doing great work, and if there's any way we can help each other, let me know. I enclosing some literature for your interest.

Sincerely,

Elora Gabriel
