

## Clinical Research Testing Results with BioElectric Shield™ and Placebo Shield (Examiner did not know which Shield was real)

Two double-blind studies tested a placebo Shield against a BioElectric Shield™. ALL 50 of the subjects were immediately strengthened with the BioElectric Shield™ – and NONE by the placebo. Researched by Dr. Charles W. Brown; replicated by Dr. Yvonne Yurichko, Chiropractic Neurologist.

### Results of Test Done December 2-7, 1993

Methods: One of the Shields had all of the internal parts to the BioElectric Shield™ and the other did not. Both the marked and unmarked Shield weighed the same. A weak muscle was found using standard Applied Kinesiological muscle testing. Both the marked and the unmarked Shields were placed separately on the pericardial alarm point CV15. If the muscle became strong it was listed as S; if it remained weak it was listed as W.

Name	Muscle Tested	Marked	Unmarked	Name	Muscle Tested	Marked	Unmarked
Mary	glut. medius	S	W	Shirley	quadratus lumborum	S	W
Susan	lat. dorsi	S	W	Eyvonne	teres minor	S	W
Doris	sartorius	S	W	Sidney	lat. dorsi	S	W
Shirley	lat. dorsi	S	W	Millie	sartorius	S	W
Sunny	lat. dorsi	S	W	Debbie	lat. dorsi	S	W
Lynn	teres minor	S	W	Sam	lat. dorsi	S	W
Leonard	neck flexors	S	W	Andrea	teres minor	S	W
Twyla	biceps	S	W	Sandra	quadriceps	S	W
Jeanette	lat. dorsi	S	W	Dorothy	deltoid	S	W
Rick	sartorius	S	W	Dennis	tensor fascia lata	S	W
Eva	supraspinatus	S	W	Becky	supraspinatus	S	W
Linda	glut. medius	S	W	Ellen	lat. dorsi	S	W
Leo	pec. clavicular	S	W				

**Conclusion:** The results clearly demonstrate that the marked Shield, later determined to be the complete BioElectric Shield™, strengthened an already weak indicator muscle.

**Further testing – Subject imagines stressful situation: Shield strengthens majority of subjects!** We pretested the subject, finding a strong muscle. Then subject imagines a stressful situation. We retest them; in 98% of subjects – the muscle is weakened. Then they hold the Shield for at least 30 seconds, and continue holding imagining the same stressful situation. Muscle strength is restored, or even stronger in some individuals. We have muscle tested more than a thousand individuals with identical results.

It would appear that stress weakens the body, and in these 1000 cases, the Shield restored strength even in the midst of the stress.
